

FIG. 1 is a block diagram of a data structure 100. The data structure 100 is divided into three fields: a first field 102 of 10 bits, a second field 104 of 22 bits, and a third field 106 of 8 bits. The first field 102 and the second field 104 together form a 32-bit field. The second field 104 and the third field 106 together form a 30-bit field. The entire data structure 100 is 40 bits long.
